Experience

Alma Better

Mentor (Subject Matter Expert – Intern)

July-2024 - August-2024

Remote

Motivated and technically skilled Subject Matter Expert with hands-on experience mentoring students in web development technologies including **JavaScript, React.js, Node.js, MongoDB, SQL, and Express.js**. Successfully guided aspiring developers during an internship at AlmaBetter, resolving technical queries and delivering clear, concise explanations. Adept at communicating complex concepts, fostering learning, and supporting career readiness for students entering the IT industry. Seeking to leverage this experience in a dynamic development or support role in the tech sector.

Certifications

Q-Spider

MERN - STACK DEVELOPER

2025

Enthusiastic and self-motivated **Front-End** Developer with strong foundational knowledge in **HTML, CSS, JavaScript**, and responsive web design. Recently completed hands-on projects using **React.js** and **Git** during academic and personal work. Quick learner with a passion for building clean, **user-friendly** interfaces and improving web accessibility. Eager to contribute to a collaborative development team and grow in a dynamic tech environment.

Projects

Video_Calling_App

Video_Calling_App

June-2025

🔗 Video_Calling_App

Video Call Web Application (React, Vite, ZegoCloud) *Built a real-time video calling web application using React and ZegoCloud's prebuilt video SDK.*

- Implemented dynamic routing with **React Router** for seamless navigation between home, room, and error pages.
- Integrated **ZegoUIKitPrebuilt** SDK for robust, low-latency video and audio calls, including camera and microphone management.
- Configured SPA routing for deployment on **Vercel and GitHub Pages**, ensuring direct links and refreshes work without 404 errors.
- **Technologies: React, Vite, JavaScript, ZegoCloud, GitHub Pages, Vercel**.

Shopify-Ecommerce-App

Shopify-Ecommerce-App

May-2025

🔗 Spopify-App

"I developed an **E-Commerce** web application using React.js for the **frontend** and **JSON Server** for the **backend.** The application features user authentication, product browsing, and a shopping cart system.

- **A full-stack e-commerce platform**
- User authentication system
- Product browsing interface
- Shopping cart functionality
- Frontend: **React.js with React Router**
- Backend: **Node.js with JSON Server**
- Build Tool: **Vite**
- Deployment: **Vercel**
